Profile

Information Systems graduate and IT Advisory & IT Audit Intern at Grant Thornton Bahrain, with practical experience supporting technology risk, governance, compliance, and control-focused engagements. Experienced in Risk and Control Matrices, evidence evaluation, control testing, audit documentation, technical proposals, and reviews of access management, password security, encryption, and data privacy controls. Additional experience in financial data analysis, IT operations, and business intelligence.

Highlighted Skills

- **IT Audit & Risk:** RCMs, control testing, evidence evaluation, audit documentation, access management, password security, encryption, compliance, data privacy
- **Data & Reporting:** Excel, Power BI, SQL, Python, SPSS, ETL, Business Intelligence, Data Warehousing
- **Systems & Architecture:** Oracle Database, Microsoft SQL Server, Visio, ArchiMate, TOGAF concepts
- **Languages:** English (Fluent), Arabic (Fluent)

Experience

IT Advisory & IT Audit Intern, Grant Thornton Bahrain - Bahrain

Apr 2026 - Present

- Contribute to IT advisory and audit engagements through risk analysis, evidence evaluation, control testing, and audit documentation.
- Develop and maintain RCMs and audit requirement lists, organizing evidence against engagement requirements.
- Assess controls covering application access, user privileges, password management, encryption, compliance, and data privacy.
- Prepare technical proposals by analyzing tenders and defining scope, objectives, deliverables, approach, and methodology.
- Review reports and working papers; participate in client meetings and document decisions and action items.

Financial Data Analyst, DHDHub - Bahrain

Feb 2026 - Mar 2026

- Built an Excel-based financial and operational cost-tracking system, structuring revenue, expense, and cost data for management reporting.
- Developed automated models and dashboards for budgeting, cost monitoring, and management decision-making.
- Improved data organization, reporting visibility, and internal workflows while providing day-to-day IT support.

IT Intern, Cigalah Medical Equipment - Bahrain

Jun 2025 - Sep 2025

- Supported IT audit and compliance activities through security and governance documentation and evidence preparation.
- Mapped network and system infrastructure and supported ETL, data-quality, and validation activities for internal reporting.
- Provided technical support during the rollout of OCE software on iPads used by medical staff.

Web Development Intern, STC (Saudi Telecom Company) - Bahrain

Jun 2023 - Sep 2023

- Supported a web development project through SQL database work, dataset preparation, and front-end and database-related tasks.
- Collaborated with cross-functional teams to deliver project requirements and resolve implementation issues.

Selected Projects

- **Sales Analytics Data Warehouse & Power BI:** Designed a data warehouse and ETL workflows, then built dashboards to analyze sales performance, trends, and key business metrics.
- **Role-Based Power BI Dashboard:** Built interactive dashboards through a web interface with tailored views for finance, operations, and technical users.
- **Machine Learning:** Applied regression and classification to real-world datasets, including preprocessing and model evaluation.
