Profile

Information Systems professional with a strong interest in AI and experience in control testing, evidence evaluation, and data validation. Supported IT advisory and audit engagements at Grant Thornton Bahrain, assessing controls and organizing evidence against requirements. Background includes financial data analysis, business intelligence, and machine-learning projects involving preprocessing and model evaluation. Brings an analytical approach, attention to detail, and clear documentation, with a focus on understanding how systems work and improving their quality and reliability.

Experience

IT Advisory & IT Audit Intern, Grant Thornton Bahrain - Bahrain

Apr 2026 - Jul 2026

- Supported IT advisory and audit engagements through control testing, evidence evaluation, risk analysis, and clear documentation.
- Developed and maintained Risk and Control Matrices (RCMs) and requirement lists, linking evidence to engagement requirements.
- Assessed application access, user privileges, password management, encryption, compliance, and data privacy controls.
- Analyzed tender requirements and prepared technical proposals defining scope, objectives, deliverables, approach, and methodology.
- Reviewed reports and working papers; documented client meeting decisions and action items to support clear follow-up.

Financial Data Analyst, DHDHub - Bahrain

Feb 2026 - Mar 2026

- Built an Excel-based financial and operational cost-tracking system, structuring revenue, expense, and cost data for management reporting.
- Developed automated models and dashboards for budgeting, cost monitoring, and management decision-making.
- Improved data organization, reporting visibility, and internal workflows while providing day-to-day IT support.

IT Intern, Cigalah Medical Equipment - Bahrain

Jun 2025 - Sep 2025

- Supported ETL, data-quality, and validation activities for internal reporting.
- Prepared security and governance documentation and supporting evidence for IT audit and compliance activities.
- Contributed to infrastructure mapping to document the organization's network and system environment.

Web Development Intern, STC (Saudi Telecom Company) - Bahrain

Jun 2023 - Sep 2023

- Supported a web development project through dataset preparation and front-end tasks, with introductory exposure to SQL.
 - Worked with cross-functional teams to address implementation issues and deliver against project requirements.
-

Education

Bachelor's Degree in Information Systems, University of Bahrain - Bahrain

Aug 2025

Skills

- **Testing & Validation:** Control testing, evidence evaluation, requirements mapping, data validation, audit documentation, access and privacy control assessment
 - **Data & Tools:** Excel, Power BI, SPSS, ETL, data warehousing; SQL (basic familiarity)
 - **AI & Machine Learning:** Regression, classification, data preprocessing, and model evaluation through project work
 - **Languages:** English (Fluent), Arabic (Fluent)
-

Professional Development

- **TOGAF 10 Foundation** - EDUCBA via Coursera, 2025
 - **Business Intelligence Essentials** - IBM via Coursera, 2025
 - **Data Warehousing and Business Intelligence** - University of California, Irvine via Coursera, 2025
 - **Governance and Management of IT** - Packt via Coursera, 2025
 - **Information Systems Auditing and Governance** - Packt via Coursera, 2025
-

Projects

- **Machine Learning:** Applied regression and classification to real-world datasets, including preprocessing and model evaluation.
 - **Sales Analytics Data Warehouse & Power BI:** Designed a data warehouse and ETL workflows, then built dashboards to analyze sales performance, trends, and key business metrics.
 - **Role-Based Power BI Dashboard:** Built dashboards through a web interface with tailored views for finance, operations, and technical users.
